

## **Set Google Search Result Time Restraints**

**TIP 17**

Looking for only the latest news about a subject or trying to find information relevant to a specific time frame? Use Google's search tools on desktop and mobile to filter your search results. After you conduct a search, click "Tools" or "Search Tools," depending on the interface, on the top right. Click "Any time" and the drop-down menu will let you narrow results to hours, weeks, and months, or even set a custom date range.
